The President's Message

The Prez Says

Good day GAUA, This month we are hosting a mystery guest. He's a former Air force Instructor who is giving us another educational opportunity. Sectional reading 101. This month also brings us the combined GAUA and EAA Chapter 64 Founders day fly-in at Gateway Airpark on the weekend of the 23/24th.

As I said last month. This is shaping up to be a great flying year. This last month we flew to Bistate for there Midwest regional fly-in great flight. There was a big delay because of fog. But the flight was great. Flying in to a towered airport was fun. The intrepid flyers were Charlie P., Bill Roland and Myself flew from Gateway. Ed Haas, Bob Karpinski and Buck flew from Charlie's. Several members drove in. Ivan Jerry and some other PPG pilots drove in as well.

The next big event was a flight to Smart Field to meet with Earl Ray so we could give a class on weight and balance. Another great flight with Bill R. and Charlie P. Driving in were Earl Ray, Tim Fedler, Bill Bucholz, Rodger Olson, Paul Bryant and more not mentioned. We had lunch at Kilroys. The Food was good. The educational opportunity went well. Rodger towed his new Kitfox lite which is a legal Ultralight. I saw it on the scale. With fine GAUA foresight The next issue of Sport Pilot followed up with an article on ... You guessed it. Weight and Balance.

There was a last minute flight to Taylorville for a Fly-in breakfast with My Wife Ellen, Charlie P. and Phil. It

Things to remember:

- Next club meeting: June 7, 2007 at Parks Airport

was a wonderful flight there. The food was great and the people were friendly It was a bit bumpy on the return trip until we cleared a big patch of puffy cumulus clouds. Then it was ok.

Another trip worth making any Sunday is to Marvin's south of troy. The picture's don't do it Justus.

See you at the meeting or in the air.
Keith Smith Prez. G.A.U.A.

Firestar 11 for Sale, \$5000. PRICED TO SELL

Camouflage paint scheme, rigged as single seater, reliable machine with approx 240 hours. Sale includes hanger space at Charlies paid thru Dec 31 2007, plans, misc. spares, original twin seats, EAA ELSA registration kit and unregistered trailer. Negatives are the wing needs recovering to repair loose false ribs (I epoxied them instead of riveting) to pass the ELSA inspection and removal of the sheet metal I used to smooth the wing leading edge as I no

longer think I used a safe method of attachment. Sure had a lot of fun with it though!
